Leistriz-Advanced Turbine Components
Metform, LLC
Rotek Incorporated

GROUP IV

Scot Forge Co. – Spring Grove

AWARDS CRITERIA

Awards are given in each of the four groups established according to average annual employment as follows:

- | | | | |
|-----|---------------------|------|----------------------|
| I. | Up to 80 employees | III. | 176 to 325 employees |
| II. | 81 to 175 employees | IV. | Over 326 employees |

First, second and third place Safety Awards are given in each group for companies having the lowest Recordable Cases Incidence Rate provided that the DART Incidence Rate falls below the group average. In the event that Recordable Incidence Rates are equal, the lower DART Incidence Rate will determine the award.

Improvement Awards are given in each group for the company experiencing the greatest improvement in the DART Incidence Rate. This award is determined by percentage of improvement by DART Incidence Rate compared with the last three years average.

A certificate of recognition is awarded to each company not receiving a first, second or third place award whose Recordable Incidence Rate falls below the group average provided that the DART Incidence Rate also falls below the group average.
