Weldaloy Expands Seamless Rolled Ring Capabilities

Warren, Mich., May 23, 2017 – Weldaloy continues to grow by making additional investments in their rolled ring capabilities and providing a wider array of custom rings for their existing and future customers.

“Upgrading our seamless rolled ring capabilities has allowed us to produce a wide variety of ring sizes in less time, while simultaneously increasing manufacturing consistency,” said Kurt Ruppenthal, VP and general manager at Weldaloy. “We are always looking for new ways to better serve our customers, and to continuously improve our business. We believe this positions us well to support the recovering oil and gas industry.”

“The newly upgraded equipment will begin production in June of 2017. Siempelkamp, handled the project. Siempelkamp has experience spanning over 140 years in designing, building and upgrading metal forming production equipment for leading edge companies around the world.”

In addition to investing in new equipment, Weldaloy has also expanded their campus by acquiring another manufacturing plant, which will be used to provide for the increased capacity and to better meet customer needs.

About Weldaloy

For 70 years, Weldaloy has been a leading provider of custom copper, aluminum, and other non-ferrous forgings serving a variety of industries such as Aerospace, Electronics, Oil and Gas, and more. Weldaloy’s goal is to create meaningful and lasting relationships with each customer by providing the highest level of service and quality. Weldaloy’s Vertical Integration Process offers its customers a single source for forged, heat treated, and machined non-ferrous metal products. For more information, visit weldaloy.com.
